SKILLS   JavaScript, Python, React.js / Redux, Pug, NodeJS, Flask / SQLAlchemy, Sequelize, Postgres, SQL, Express, HTML5, CSS3, Git, Object-oriented Programming (OOP)

PROJECTS

Instavibes | *(ReactJS / Redux, JavaScript, Python, SQLAlchemy)*   **live** | **github**
- Enabled a streamlined post Modal, circumventing limited Instagram web capabilities, allowing users to upload image and status updates throughout the entirety of the application
- Established a robust notification system, querying postgres database tables and loading it to the redux store based on view status
- Equipped a fetching Hashtag and User tag process with an Infinite Scroll webpage, allowing for autocomplete searches and permitting image posting process users to upload original images through AWS S3

Iron Logs | *(React / Redux, JavaScript, Python, SQLAlchemy)*   **live** | **github**
- Implemented a sophisticated tracking component utilizing react and python; allowing users to log workouts, diary entries, and food logs
- Constructed dropdown form submission and form inputs utilizing third party react components; streamlining user time management
- Utilized asynchronous JavaScript ES6 syntax in order to facilitate real time DOM interaction from user input events

Infinium | *(Node, Express, Sequelize, Pug Template)*   **live** | **github**
- Designed a multitude of backend routes in order to display trending and highlighted user articles onto a users homepage
- Employed CSS grid layout in order to match and improve upon Mediums existing website design layout
- Established numerous backend variables that our pug template would be able to utilize.
- Synchronized backend variables with pug HTML templating which simulated a pseudo-useEffect render of user data

EXPERIENCE

Operations Assistant
Dominion Payroll   July 2019 - January 2020
- Within a weekly basis, ensured prompt delivery of payroll and human resource documentation for over 1000+ clients
- Provided logistical support to not only our customer service department here in Richmond but to the majority of our offices located throughout the country
- Processed payrolls after checking with client that hours, bonuses, and deductions were correct

Operations Specialist
DHL Same Day   September 2018 - April 2019
- Build and maintain customer relationships in order to address their specific requests and issues
- Provided prompt resolution to immediate issues by investigating, speaking with all involved parties, and collaborating with my team (CRM)
- Answer questions on shipping rules & regulations, delivery alternatives and other solutions provided by our organization
- Created daily resolution spreadsheets to present to our customers and upper management

EDUCATION
AppAcademy - 1000-hr program dedicated to web development and software engineering fundamentals, 2021
Radford University - *BS Criminal Justice, 2014-2018*
